

## Ceramic Lined Ball Valves

**Rojan** offer ceramic valve components in different ceramic materials to suit special operating requirements.

Rojan's ceramic valves have the following properties:

- high wear-resistance
- excellent corrosion resistance
- ceramic parts maintain their physical and mechanical properties at elevated temperatures

Rojan can refurbish old valves at a fraction of the cost of new valves.

Our range covers Ball and Butterfly valves.

Some of the materials we currently offer are:

- High Density Alumina
- Sintered Silicon Carbide
- Siliconised Silicon Carbide
- Silicon Nitride / Sialon
- Partially Stabilized Zirconia
