

Engineered Tiles & Tiling

Rojan specialises in the supply and installation of ceramic tiles and shapes into standard and non-standard wear applications such as:

- Chutes
- Launderers
- Box Bends
- Large Cyclones
- Rock Boxes
- Pipes
- Whirly Jigs
- Deflector Plates

We use specially engineered tiles or a combination of single ceramic pieces and tiles to offer a cost effective solution to your wear problems.

The tiles and ceramic lining materials are available in a multitude of types, shapes and sizes. The standard, generally off the shelf items, are:

- flat
- rectangular tiles
- flat tapered sided tiles
- hexagonal tiles
- microtiles
- curved tiles

We offer the tiles and shapes in a range of materials selected to suit the operating environment.
