

## Hydrocyclones

**Rojan** specialises in manufacturing replacement liner parts to fit cyclones supplied by all leading hydrocyclone OEMs including:

- Warman
- Krebs
- Multotec
- Linatex
- Concord
- Hydrotec
- AKW
- Mosley

Rojan parts include spigots (apexes), lower and upper cones, cylinder liners, feed chamber liners, cover plates, vortex finders, adapter pieces and splash skirts.

We offer the following materials to suit your needs:

- Rubber
- Polyurethane
- Alumina 92%
- Alumina 99.8%
- Siliconised silicon carbide
- Sintered silicon carbide

\* The comparative data presented are indicative values and could vary depending on processing pressures and ore characteristics.

### Proven Industry Results:\*

#### Alternative Material

#### Rojan

#### Gold Mining

- |                          |                   |
|--------------------------|-------------------|
| A) Refrax Spigots        | SiSiC 10x Longer  |
| B) Nohard Vortex Finders | Alumina 5x Longer |

#### Alumina Refineries

- |  |                    |
|--|--------------------|
| A) Polyurethane or Rubber Cyclone Liners | Alumina 20x Longer |
|--|--------------------|

#### Mineral Sands

- |                   |                        |
|-------------------|------------------------|
| A) Rubber Spigots | SiSiC 5x to 10x Longer |
|-------------------|------------------------|
