

## Pipe Linings

Rojan is capable of lining all shapes and sizes of pipes, elbows, Tees and bends using one piece cylindrical Silicon Carbide or Alumina ceramic.

Proven results\* are improved life over:

- Polyurethane: 10 x
- Rubber: 8 x
- Refrax: 5 x
- Alumina Tiles: 5 x

\* dependent on processing duty

***Thereby resulting in lower maintenance costs, improved processing and overall cost saving!***

Rojan has the capability to manufacture cylindrical ceramic liners of different sizes and materials. By using single piece components we effectively *eliminate* wear initiation joints when pipes are lined with ceramic tiles.

The materials we currently offer are:

- High Density Alumina
- Siliconised Silicon Carbide
- Sintered Silicon Carbide
