

Rapid Seal Clamps

Rojan's Rapid Seal Clamps ease the frequent headaches that pipe blow-outs can cause.

The “wear seal” consists of hard ceramic plates embedded into a soft pliable polyurethane with a sturdy binding strap.

With a simple ratchet system it can be installed in a matter of seconds, allowing the processing plant to continue running with minimum disruption.

This simple, easy to use device covers all pipe sizes from NB90 to NB1000.

Besides getting one out of immediate trouble, it can easily be reused once the change out is complete.

We currently offer the following sizes:

- NB90 to NB150
- NB150 to NB300
- NB300 to NB500
- NB500 to NB1000
